

Product Data Sheet

Oven Liner / Aga Liner

Thickness:	0.19mm	Weight:	355g/m ²
PTFE Coating:	44%	Warp Tensile Strength:	2500 N/5cm
Warp Tear Resistance:	30N	Coating Adhesion (N/5cm):	NA
Surface Resistance (Ω /m ²):	Insulative	Operating Temperature:	-72 to +260°C

Material Properties

- Heat resistant up to 260°C
- Can easily be cut with scissors
- Chemical resistant
- Will last for years
- Industrial grade

Additional Information

Techbelt oven / Aga liner is not a low cost alternative but an industrial grade PTFE coated non-stick material as used by some of the worlds largest food manufacturing companies and we bring this straight to your home.

This industrial grade non-stick liner is easily cleaned with either soapy water or in a dishwasher and it can last for years.

All our materials are cut in house, so if you have a specific size requirement please contact our sales office on: +44 (0)1422 366386 who will be happy to help with your enquiry.

****PLEASE NOTE - not to be used when the heating elements are at the base of your oven or Aga.**
