

## Product Data Sheet

## Silicone Cookie & Baking Mat

Coating:	<b>Silicone Rubber</b>	Material:	<b>Silicone Rubber Coated Glass Fabric</b>
Thickness:	<b>0.55mm</b>	Weight:	<b>Plain</b>
Tensile Strength:	<b>2100 N/5cm</b>	Temperature Resistance:	<b>560g/m2</b>

### Material Properties

- High temperature resistant up to 280°C
- Easily cleaned with soap & water
- Dishwasher safe
- Food regulation compliant
- Suitable for use in the freezer as well as in the oven
- 100% silicone coating
- Flexible - anti-slip material

### Additional Information

The Tefsil® Silicone Cookie / Baking Mat is a great non-stick 100% silicone that is ideally suited for use when kneading and mixing dough, preparing and rolling pastry and marzipan as well as meat products, pasta and chocolate. It can also be used very well with delicate sugar craft.

The surfaces are silicone coated which is flexible and anti-slip ensuring the Baking Mat does not slide

The Tefsil® Silicone Cookie / Baking mate can be placed directly in to your oven within a baking tray and because of the silicone surface will resist being blown around in a fan assisted oven.
