

## **Rotary Band PTFE Heatsealing Belts**

Techbelt manufactures 2-ply laminated PTFE belts for use on rotary band sealing equipment. We have the ability to laminate to any length and up to 1000mm in width.

For these style of belts the widths are normally very narrow being 10mm up to 25mm wide. The lengths are typically 1000mm up to 2500mm.

The materials we use range from standard to premium grades depending on the customers requirement or process.
