

PTFE DEHYDRATOR SHEETS

PTFE (Polytetrafluoroethylene) Dehydrator Sheets are specialized non-stick sheets that are designed to fit the trays of food dehydrators. These sheets are made from high-quality, food-grade PTFE material, which is known for its exceptional non-stick and heat-resistant properties. They are commonly used for dehydrating fruits,

Material Properties

- Smooth non stick PTFE coating
- Temperature resistant from -73°C to plus 260°C
- Lightweight and energy efficient for economical operation
- Chemical inertness: Affected only by a few rare substances at very high temperatures.
- High Release from sticky materials 'Non-Stick.
- Easy cleaning (Nothing bonds permanently)

Specifaction

Tefsil 3 Non-Adhesive Cut Sheets

Applications

- Dehydration Machines

Features / Benefits

Non-Stick Surface: PTFE sheets facilitate easy removal of dehydrated items and simplify clean up by preventing food from adhering to dehydrator trays.

Reusability: These sheets are both durable and reusable, sparing you the expense of disposable parchment paper or other liners.

Food Safety: Comprising food-grade PTFE material, they are safe for use with all food types and do not release harmful chemicals or odors when exposed to heat.

Uniform Drying: These sheets encourage consistent air circulation and heat distribution, ensuring thorough and even food drying.

Versatility: PTFE dehydrator sheets are suitable for a wide array of foods, ranging from fruit leathers to jerky and beyond.
